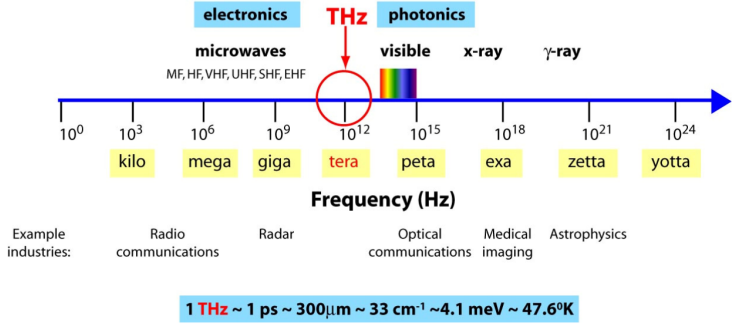
Outline

The THz Gap



1 THz ~ 1 ps ~ 300μm ~ 33 cm^{-1} ~4.1 meV ~ 47.6°K

The electromagntic spectrum from G. P. Williams, Rep. Prog. Phys, **69** (2005) .

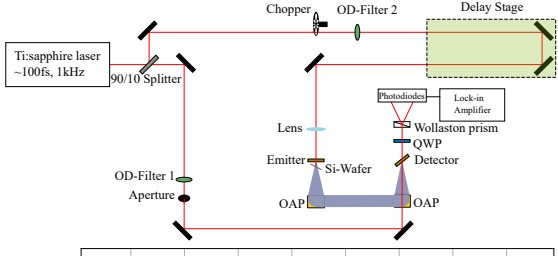
Terahertz

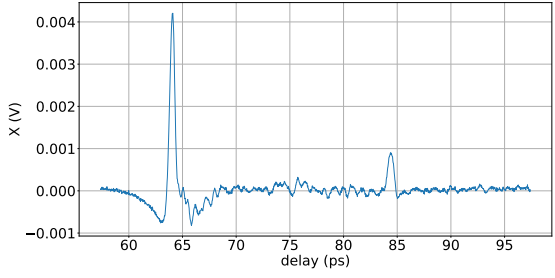
So why do we need terahertz radiation?

- medicine
- security
- data transmission & saving
- physics

Introduction

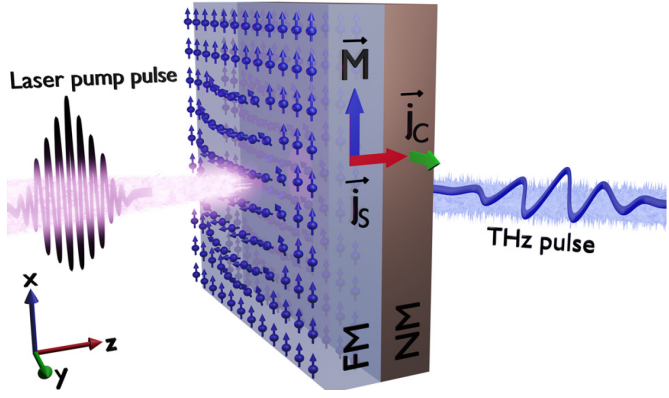
- PCA
- Non linear crystals



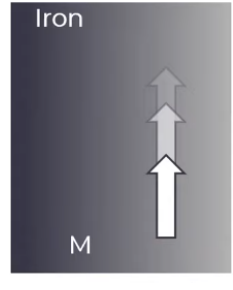


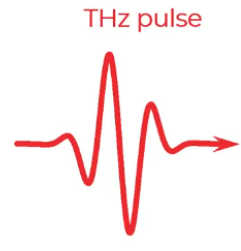
What are Spintronic emitters?

- Ferromagnetic Material (FM)
- Non Magnetic (NM)
- Magnetic field



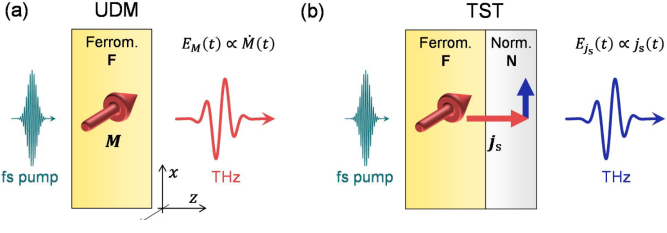
How does it work?

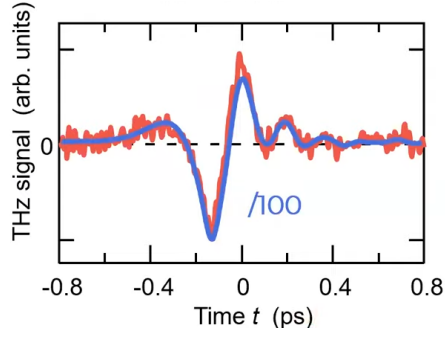




$$E_{\mathrm{DM}} \propto \dot{M}(t) \tag{1}$$

Stronger if we attach NM

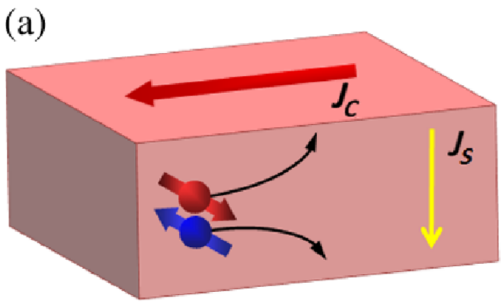




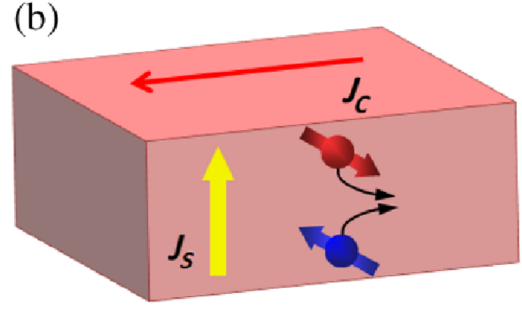
Where does the current come frome?

Inverse Spin Hall effect!

Spin Hall effect



Inverse Spin Hall effect



2 Layers are not the end
